NES Emission / Heat Output	9mg/MJ
Minimum Avg Output	10.4KW
Maximum Avg Output	14.6KW
Peak During Emission Tests	15.2KW
Wetback KW Output	2.2KW

WALL INSTALLATION

clearances in mm to combustibles
Clearances to combustibles are absolute minimums.
Where practical these should be exceeded.

CORNER INSTALLATION

WETBACK PIPE POSITIONING

Wetback changes rear clearances under AS/NZS2918:2001

For more information about our clearances check out our installation instructions on our website

WB (woodbox) uses an ash hearth. LB (low base) must have 46mm insulating hearth
